

Life Management: The Career Pathways Foundation Course

Are students ready to manage work, family and personal life? The key to motivating students to learn about Home Economics Careers and Technology career pathways is a solid foundation in the content areas. Life Management provides critical skills and knowledge about food and nutrition, human development, fashion, textiles and apparel, housing and interior design, personal financial literacy, child development and healthy living. This workshop will provide strategies and information for “real life lessons” to bring the curriculum to life! Each person will receive a copy of the Life Management curriculum with a crosswalk to the current standards.

Highlights

- Managing personal, family and work roles
- Developing career awareness related to Consumer and Family Studies content areas
- Developing Leadership and Career Skills - FHA-HERO
- Using standards-based curriculum and assessment strategies
